ALLOWANCE

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The prior art of record discloses a roll-bowl type mill for pulverizing solid fuels for use in firing a steam generator, the pulverizing mill comprising a bowl having a predetermined diameter, one or more rollers each connected to an assembly through an associated roller bearing, the assembly for holding each of the one or more rollers and for applying a preload on each of the one or more rollers, each of the one or more rollers located a predetermined distance above the bowl, and one or more linear transducers mounted on the assembly to measure displacement of the assembly when the mill is operating, and a data acquisition system having as an input the displacement of the assembly measured by the one or more linear transducers, the data acquisition system comprising a computer. However, as argued by Applicant's response dated October 25, 2006, the prior art of record does not disclose or render obvious the roll-bowl type mill with all of the details of the limitations of the independent claims and, in particular, a structure of the computing device programmed to carry out data collection and frequency power spectrum analysis of the displacement of the assembly to determine the diameter by using the formula in lines 17-20 of claim 1, lines 17-21 of claim 7, or lines 18-21 of claim 8.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason Y. Pahng whose telephone number is 571 272 4522. The examiner can normally be reached on 9:30 AM - 8:00 PM, Monday-Thursday.
